Your Details

Name of lead observer(s):	Email:
---------------------------	--------

Your Survey Site Details

Survey site details. Street address OR park/reserve name and suburb. <i>If you have surveyed a site in previous years and still have access to that site, please survey the same site.</i>	
Location coordinates* (if known, to at least 4 decimal places)	Local Government Area (if known)
*To find the coordinates of any location on Google Maps , click or tap and hold a spot on the map to drop a red pin. On a computer, the latitude and longitude appear in the bottom card or via a right-click; on a phone, look at the dropped pin info panel or the top search bar)	
Estimate size of survey site The preferred search area is 50m x 50m.	_____m x _____m or _____m ²
Description of survey site: ☐ Suburban garden ☐ Semi-rural house-block ☐ Suburban park/sports field/golf course ☐ Native bushland e.g. national park, nature reserve ☐ Bushland adjacent to wetland/river ☐ Other: _____	
More location detail e.g. nearest crossroad, position in park/nature reserve. Include any changes to the site since the last survey (such as clearing of vegetation, planting new vegetation, new pets, etc.)	
In the last 6 months, have you seen quendas at your site?	YES ☐ NO ☐ UNSURE ☐
Do you see fresh cone-shaped diggings at your site?	YES ☐ NO ☐ UNSURE ☐
Have you seen any evidence of breeding at your site this year? (e.g. juvenile quendas and/or females with pouch young):	YES ☐ NO ☐ UNSURE ☐
Have you noticed any quenda with extensive areas of bare skin, or patchy or missing fur at your site? Some quendas may have small patches of fur missing due to fighting or scratching. This question refers to large/ extensive patchiness or hair loss that can be a symptom of sarcoptic mange.	YES ☐ NO ☐ UNSURE ☐
Any other comments:	
Have you seen any dead quendas this year? (inside or outside the survey site but within the same suburb) Write a number next to each relevant cause of death (if you can't remember, your best estimate is fine): Road kill: _____ Cat: _____ Dog: _____ Fox: _____ Other/Unknown: _____ Total: _____	

Your Surveys at this Survey Site (if you are surveying multiple sites, please fill in a separate form for each site)

Step 1) Choose any week in October and do at least one Quenda Count – a single survey is useful but we encourage you to do two or three, spaced by at least one day. Ideally, your surveys should take a **minimum of 10 minutes** and a **maximum of 30 minutes**.

Step 2) Conduct your surveys (up to 3 within one week) – look out for quendas in your survey site and record how long you spent looking and how many unique quendas you saw. **If you don't see any quendas on any day that you are looking for them, write zero (0) for that day. This is very important data!**

	Date	Total time looking for quenda (in minutes)	Number of quendas seen
Survey 1			
Survey 2			
Survey 3			

Please return completed data sheets by 8th November, 2026 to quenda@wagouldleague.com.au
